WMFE

WMFE Fiber Optic Wall Mount Fiber Enclosure

The WMFE FTTX is a wall mounted fibre management system for broadband network architecture that provides optical signals to the customer premises.

Features:

- Compact and modular wall- mountable customer termination box
- Fibre splices can be managed in single circuits using the fibre organising systems.
- Cable coming into the enclosure is hidden by protective tubing which is secured to the external wall (not included)
- Three fixing holes located on the box so it can be secured tightly to the external wall.

Product Classification

Regional Availability	EMEA
Portfolio	CommScope®
Product Type	Fiber wall box
Product Series	WMFE

General Specifications

Cable Entry Location	Bottom
Color	Light Gray (RAL 7035)
Interface	LC/APC	SC/APC	Unloaded
Mounting	Wall mount
Patch Cord Routing	Downward
Patching Capacity, maximum	4
Port Capacity, maximum	4
Splicing Type	SMOUV

Dimensions

Height	196 mm	7.717 in
Height, with cover	281 mm	11.063 in
Width	154 mm	6.063 in
Depth	43 mm	1.693 in
